Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Sunday 26 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Rain, sleet and hill snow moving northwards, easing later Sunday.

Today:
A cold and extensively cloudy day, with a band of rain, sleet and hill snow making very gradual progress northwards. The rain and hill snow should become lighter and more intermittent later, with brisk winds easing. Maximum temperature 5 deg C (41 deg F).

Tonight:
It should become mostly dry overnight but in lighter winds there will be extensive areas of low cloud, giving mist and fog in places. Minimum temperature 1 deg C (34 deg F).

Monday:
Areas of low cloud are likely to be slow to clear, but a few brighter spells are possible. Mostly dry but perhaps the odd light shower. Still rather chilly. Maximum temperature 5 deg C (41 deg F).

Outlook for Tuesday to Thursday:
Tuesday, largely cloudy with some rain or showers. Drier start Wednesday, then a spell of heavy rain, becoming windy but milder. Thursday, windy but mild, further spells of rain likely.
